

Análisis de coyuntura

- Las perspectivas de inflación subieron nuevamente, para la general y para la subyacente. Con base en el Banco de México, el crecimiento económico fue marginalmente revisado a la baja para 2026 y al alza para 2027, **mientras que las expectativas de tipo de cambio y tasa de interés permanecieron sin cambio para 2026.**
- En febrero las remesas siguieron perdiendo poder adquisitivo debido a la apreciación del peso y a la inflación de México. **En marzo la volatilidad del tipo de cambio subió a su mayor nivel desde abril de 2025. En esa fecha, los EE.UU. anunciaron los aranceles recíprocos.** El aumento de la volatilidad en marzo se debió al inicio de la guerra en Irán. La moneda mexicana acumuló una apreciación de 1.05% (-19 centavos) con respecto al cierre de 2025.

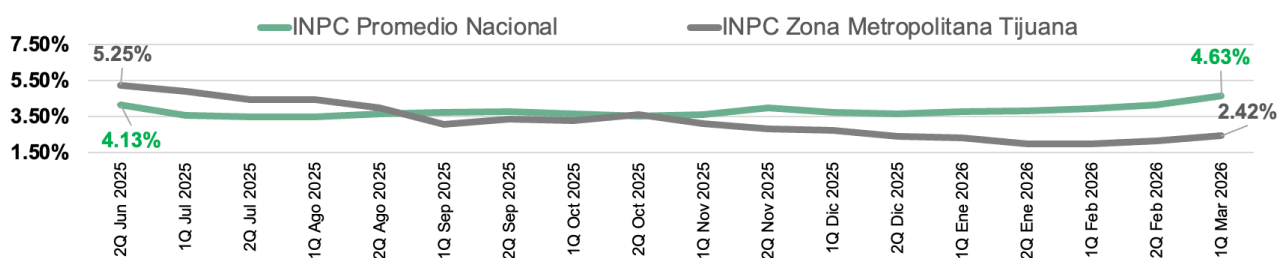

Situational analysis

- Inflation forecasts rose again, both for headline and core inflation. Based on data from the Bank of Mexico, economic growth was marginally revised downward for 2026 and upward for 2027, **while exchange rate and interest rate expectations remained unchanged for 2026.**
- In February, remittances continued to lose purchasing power due to the appreciation of the peso and inflation in Mexico. **In March, exchange rate volatility rose to its highest level since April 2025. At that time, the U.S. announced reciprocal tariffs.** The increase in volatility in March was attributed to the start of the Iran nuclear deal. The Mexican peso appreciated by 1.05% (-19 centavos) compared to the end of 2025.
